

Corrugated HDPE Storm pipe

In recent years the specification and use of dual wall High Density Polyethylene (HDPE) corrugated pipe for storm water has increased dramatically. Advantages, such as the pipe's strength, durability and joint integrity increase the long-term cost-effectiveness. Results show that forward-thinking municipalities are realising the future of storm water management relies on the best available technology. HDPE (PE100) corrugated pipes are manufactured from the highest quality materials and are the most technologically advanced product available to move storm water and waste water. HDPE (PE100) corrugated pipe is the proven, reliable, cost-effective and safe solution for your long-term drainage needs.

Storm water management is a critical component to ensure the long-term viability of public and private economic investments. Produx offers a range of products to meet the critical demands of engineering design and contractor communities. HDPE (PE100) corrugated pipes are manufactured with a co-extruded twin wall. The end product is a smooth bore inner layer and a corrugated outer layer which provides a high stiffness to weight ratio for non-pressure applications. Pipes from Diameter Nominal (DN) 100mm to DN 900mm are manufactured in accordance with AS/NZS 5065.

*1050-2000mm pipes can also be manufactured with an electro-fusion joint

*Overall and effective lengths may change without notice

**Quantities are approximate and may vary due to unforeseen circumstances

From 1050-4000 different stiffness ratings can be manufactured
